Passerelles Numériques Cambodia (PNC) is a non-governmental organization (NGO) established in 2005 in Phnom Penh. It is the founding center of the international non-profit Passerelles Numériques, which aims to empower underprivileged and disadvantaged Cambodian youth through free, high-quality technical education and professional development in Information Technology (IT).

1. Key Overview & Mission

- Founded: 2005 (Phnom Penh, Cambodia)
 - Local Operating Partner: Promoting Skills for Success (PSS)
 - Accreditation: Recognized by the Cambodian Ministry of Education, Youth and Sports (MoEYS)
 - Core Purpose: To bridge the digital divide and eradicate poverty by equipping vulnerable youth—especially young women and students from rural provinces—with market-relevant digital skills.
-

2. Academic Programs & Curriculum

PNC provides a full-time, 2-year Associate Degree in Computer Science alongside a Passerelles Numériques Certificate. The curriculum is updated regularly to align with local tech industry demands and offers two specialized majors:

1. Software Development (Dev): Covers web design, front-end development, back-end programming, Object-Oriented Programming (OOP), database management, and REST APIs.
2. Systems, Networking & Cybersecurity (SNA): Focuses on network administration, IT infrastructure, server management, hardware troubleshooting, and cybersecurity fundamentals.

Holistic Learning & Soft Skills

Beyond technical IT skills, the curriculum includes:

- English Language Proficiency (general and technical English).
 - Professional & Soft Skills: Critical thinking, public speaking, teamwork, business ethics, CV preparation, and interview coaching.
 - Practical Experience: A 16-week full-time internship with partner tech companies in Cambodia prior to graduation.
-

3. Scholarship & Comprehensive Student Care

PNC operates on a 100% scholarship model to remove all financial barriers for underprivileged students. Selected trainees receive full support, including:

- Tuition & Educational Materials: Computer labs, laptops, and study resources.
- Basic Needs: Free housing/dormitories in Phnom Penh, daily meals, personal hygiene items, and pocket money.
- Healthcare & Well-being: Medical care, health insurance, and psychological/counseling support.

4. Selection & Recruitment Process

PNC conducts annual recruitment drives across rural provinces in Cambodia to reach students from low-income backgrounds:

1. Awareness Campaigns & Applications: Outreach conducted in high schools across rural provinces.
2. Academic & Logic Exams: Written assessments in basic mathematics, logic, and English.
3. Personal Interviews: Assessing motivation, aptitude, and career goals.
4. Social Field Investigations (Home Visits): In-person verification of the candidate's family socio-economic status to ensure support reaches those in genuine need.

5. Impact & Key Metrics

- Graduates: Over 1,840+ young professionals graduated since 2005.
- Employment Rate: Over 98% of graduates secure employment in the tech sector, with 92% finding jobs within 3 months of graduation.
- Gender Equality: Over 52% female enrollment, promoting women in STEM across Cambodia.
- Economic Transformation: Graduates earn an average entry-level salary of around \$300-\$350 USD/month, enabling them to support their families and uplift their communities out of poverty.
- Total Beneficiaries: Transformed the lives of more than 6,000 people (students and immediate family members combined).

6. Location & Contact Information

- Location: Phnom Penh, Cambodia
